

Global Product Compliance

safetyengineeringlaboratory

Navigating compliance with integrity since 1971

- **Product Safety Consulting, Testing and Training**
- **EMC Training and Support**
- **International Approvals**
- **Homologation for Telecom Equipment**

SEL has the experience to help you sort through the confusion and complexities of international approvals. Our engineers have the technical expertise and proficiency with the processes to know exactly what is needed for testing and worldwide certification.

Time-Proven Process

At SEL, our goal is to build relationships with our clients to help them implement successful compliance programs. We use time-proven procedures refined since 1971. Your success is our success.

Project Management

Successful compliance programs mandate exceptional project management tools. SEL's tools include:

- online interface
- customized handouts
- custom project management software

Integrity

SEL considers our reputation to be vital to our business. We strive to enable our clients to engineer safe, compliant products without compromising cost, time or integrity.

Compliance by Design

The fastest and most predictable route to market is by designing products according to the Standards from the beginning. SEL's design team has the experience to assist you at any stage of the process.

Flexibility

SEL does not try to sell you more than you need. We recommend the best approach based on your needs. There is no such thing as a "one size fits all" principal for product compliance.

Experience

SEL has over 33 years experience securing UL, CSA, European (CE Mark/TUV) and worldwide product certifications on thousands of products.
